

Model 70730 - Specification Sheet

Basic Description

The General High Voltage 70730 has been designed with reliability and low cost in mind. A versatile high voltage module with mains input, this supply has been effective in electrostatic cleaning applications. The module is preset by Genvolt at the required voltage.

Performance Parameters

| | |
|-----------------|---|
| Input voltage | 230V +10% 50/60 Hz |
| Output voltage | Preset voltages up to 7kV available. |
| Output current | 4mA nominally @ 7kV |
| Output power | 30 Watts maximum |
| Output polarity | Positive or Negative outputs available. |
